

NOVA-REP-001 — Repository Guidance

Create ONLY the engineering foundation.

Do not implement business logic.

Repository:

Project_NOVA/ 00_Blueprint/ 01_Source/ 02_Research/ 03_Experiments/
04_Releases/ 05_Templates/ 06_Tools/

Populate every directory with README.md explaining its purpose.

Inside 01_Source create placeholders for: apps/ core/ engines/ services/ capabilities/ skills/ tools/ plugins/ integrations/ shared/ config/ tests/ scripts/

Wait for approval before implementing the first capability.
